Braiding Cord #16994

Finger Paint #21380

Banner Paper #18220

Wax Paper • Scissors •

available at **Walmart**
Save money. Live better.

Instructions

1 Gather your supplies.

5 Make sure to cover a large area of your paper with the paints.

2 Cut a piece of Banner Paper to desired size

6 Once you are done adding colors fold your piece of banner paper in half. Use your fingers to "squish" all the colors together between the wax paper.

3 Cut a piece of wax paper to about the same size as your Banner Paper.

7 Open up the wax paper. Now it is time for the print making aspect of the project!

4 Add Finger Paints to your wax paper. **Tip:** you might start out with just (2) primary colors and show your child how when you mix "red and yellow" together you get orange!

8 Take the wax paper and place it paint side down on your piece of Banner Paper. **Tip:** with a little assistance, children as young as three can do this alone!

Finger Paint Transfer Art Paintings

9

Peel off the wax paper. You have now made a transfer print of the original finger paint design!

13

Repeat Steps 6-8 and smooth the wax paper over the Banner Paper. Make sure to rub paint all around your string design!

10

Display your Finger Paint transfer art!

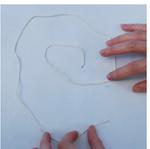

14

Remove the wax paper. You have now created a second magical piece of art!

11

Once you have completed (1) design, the wax paper can be used to create more transfers. First, add a little more paint to the wax paper. Next, cut an additional piece of Banner Paper for your new print.

12

Add a new element to your design, such as laying down a piece of string onto the new piece of Banner Paper.
